EuroACE invites you to our last webinar in the series entitled *"Ensuring the uptake of smarter solutions for better performing buildings"*, which will take place on **Friday 4 June 2021 (09:30-10:40 CET)** via **GoToMeeting**.

In the context of the ongoing public consultation on the Energy Performance of Buildings Directive (EPBD), we are hosting a series of three webinars entitled *"Future-proof EPBD: let's deliver beyond the Renovation Wave!"* that focuses on different aspects of the EPBD. Our [first webinar](#) explored the introduction of Minimum Energy Performance Standards, their regulatory nature and how these policy instruments fit into the EPBD 'architecture' and our [second webinar](#) focused on the update of Energy Performance Certificates, how to make them work for end-users, ensure their coherence with deep energy renovations and integrate them with other building information tools such as Digital Building Logbooks and Building Renovation Passports.

Our last webinar will consider how digital and smart solutions will boost digitalisation of our buildings while improving their data and strengthening their role in smart sector integration. Smart solutions (e.g. Smart Meters, Building Information Modelling, Digital Twins) can contribute to dramatically optimise and improve the energy performance of a building while securing cost-savings to occupants as well as have a positive impact on their health, wellbeing, comfort and safety. As buildings occupy a key position in the EU's energy system, innovative smart building technology will play an important role in decarbonising our building stock.

Draft Agenda

09:30 | Opening remarks and guidance to participants - Julie KJESTRUP, EuroACE President

09:40 | Digital at the service of the Renovation Wave – Ray PINTO, DIGITALEUROPE

Presentations: “The growing role of smart and digital solutions to keep in check the energy performance of our buildings”

09:50 | Clemence ARTO, Autodesk

10:00 | Christina von WESTERNHAGEN, Johnson Controls (JCI)

10:10 | Dr. Claudio DEL PERO on behalf of the HEART Horizon 2020 project (*invited*)

10:20 | Q&A Session moderated by: Julie KJESTRUP, EuroACE President

10:35 | Conclusions - Julie KJESTRUP, EuroACE President

About the organisers:

EuroACE - Energy Efficient Buildings

EuroACE represents Europe's leading companies involved with the manufacture, distribution and installation of energy saving goods and services for buildings. EuroACE members employ more than 220,000 people in these activities in Europe and have over 1,100 production facilities and office locations. The mission of EuroACE is to work together with the EU institutions to help Europe move towards a more efficient use of energy in buildings, thereby contributing to Europe's commitments on climate change, energy security and economic growth.
